DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-20 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No.6,614,953.

Although the conflicting claims are not identical, they are not patentably distinct from each other because Claim 1 is a broader version of claim 1 of the 953' patent with the difference being the last paragraph which states ...”wherein the plurality of input ports of the second plurality of multiport optical devices are optically coupled to respective ones of the plurality of output ports of the first plurality of multiport optical devices..”

However this phrase does not patentably distinguish from the claims of the patent because the claims of the patent already call for “An all-optical cross-connect comprising first and second pluralities of multiport (selective) optical devices...” which

would encompass the limitations of the last paragraph of claim 1 of the patent. Claim 1 of the patent also encompasses the independent wavelength components of claim 2 of the application. Claim 3 of the application can also said to be encompassed in claim 1 of the patent because the optical cross-connects can also be said to be functionally equivalent to optical couplers. Claim 4 of the application is fully encompassed in the limitations of claim 3 of the 953' patent. Claim 5 of the application is fully encompassed in the limitations of claim 4 of the 953' patent. Claims 6-20 are essentially of the same scope and are fully encompassed by claims 5-19 of the 953' patent.

3. Claims 21-38 have been cancelled by Applicant.
4. A copy of PTO-1449 will be included in this office action.
